

EMC Live Webcast: The Better Way to Build Applications

Tuesday, April 19, 2011
11:00 am PT / 2:00 pm ET / 18:00 GMT

[Register now >](#)

The conventional approach to application development—custom coding—is no longer effective. To meet business needs with limited resources, you need a better solution.

With EMC Documentum xCP, you can leverage proven templates and design patterns to configure pre-built components—enabling you to accelerate case-based application development.

Attend this webcast and learn how you can:

- Speed application development and time-to-market by using configuration instead of custom coding
- Change applications with minimal involvement from IT
- Connect application intelligence to pre-built process snippets, form controls, and user-interface widgets
- Get inspiration from the 20+ applications and utilities submitted by Documentum developers as part of the recent xCelerator Challenge
